Precision Health Day 2026 - AI Enabled

**March 27th, 2026
from 8:30 to 18:00
Lugano, East Campus
Multipurpose Room**

The second edition of the Precision Health Day will highlight the role of Artificial Intelligence (AI) as a driving force for innovation in precision health.

The event will explore how AI can support and promote a holistic approach to care — one that integrates interindividual variability related to behavioral, environmental, and genetic factors, with the goal of developing proactive, personalized, and patient-centered healthcare solutions.

Keynote Speaker
Prof. *Stavroula Mougiakakou*, head of the leads Artificial Intelligence in Health and Nutrition (AIHN) Laboratory at the University of Bern
