	<b>Parallel to professional activity</b> <sup>PAP</sup> 120 ECTS over 4 years

For further  
information

## What it is about

The Master's program builds upon knowledge acquired during the Bachelor's program in conservation, and allows students to develop, through an interdisciplinary approach, a greater understanding of methods, materials, and techniques of conservation-restoration of wall paintings, stone and stucco decoration.

## How it is structured

Semesters I - II			
15%	55%	20%	10%
Theory lessons	Field-work	Courses Swiss Conservation Restoration Campus	Thesis

  

Semesters III - IV			
10%	25%	20%	45%
Theory lessons	Field-work	Courses Swiss Conservation Restoration Campus	Thesis

## Why choose this Master's degree

The program allows students to acquire the skills necessary to plan and carry out preventive, remedial, and post-treatment interventions with an interdisciplinary approach. Field-work is carried out on sites of great historical, artistic and cultural value, located in local, national and international contexts.

## Professional perspectives

A graduate will be qualified to work as an independent conservator-restorer of cultural heritage with full responsibility in the planning, management and execution of conservation-restoration projects on wall paintings, stucco and stone.

## Educational perspectives

It is possible to register for PhD-programmes in conservation-restoration according to the rules of the different university institutions.

## Admission requirements

Admission is possible with a Bachelor's degree in Conservation or an equivalent qualification. Further information on requirements can be found on the Master's webpage.

## How to register

The application for admission must be submitted only online on the SUPSI Student Portal.
